## CMOS 18-Stage Static Shift Register

High-Voltage Types (20-Volt Rating)

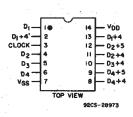

■ CD4006B types are composed of 4 separate shift register sections: two sections of four stages and two sections of five stages with an output tap at the fourth stage. Each section has an independent single-rail data path.

A common clock signal is used for all stages. Data are shifted to the next stage on negative-going transitions of the clock. Through appropriate connections of inputs and outputs, multiple register sections of 4, 5, 8, and 9 stages or single register sections of 10, 12, 13, 14, 16, 17 and 18 stages can be implemented using one CD4006B package. Longer shift register sections can be assembled by using more than one CD4006B.

To facilitate cascading stages when clock rise and fall times are slow, an optional output ( $D_1+4'$ ) that is delayed one-half clock-cycle, is provided (see Truth Table for Output from Term. 2).

The CD4006B types are supplied in 14-lead hermetic dual-in-line ceramic packages (D and F suffixes), 14-lead dual-in-line plastic packages (E suffix), and in chip form (H suffix).

## TERMINAL ASSIGNMENT

ALL INPUTS (TERMINALS 1,3,4,5,6) PROTECTED BY CIMOS PROTECTION NETWORK

9205-28974

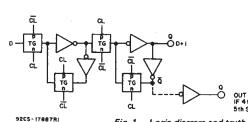

# CD4006B Types

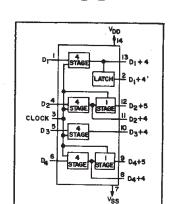

#### Features:

- Fully static operation
- Shifting rates up to 12 MHz @ 10 V (typ.)
- Permanent register storage with clock line high or low no information recirculation required
- 100% tested for quiescent current at 20 V
- Standardized, symmetrical output characteristics
- 5-V, 10-V, and 15-V parametric ratings
- Maximum input current of 1 μA at 18 V over full package-temperature range; 100 nA at 18 V and 25°C
- Noise margin (full package-temperature range) = 1 V at V<sub>DD</sub> = 5 V 2 V at V<sub>DD</sub> = 10 V 2.5 V at V<sub>DD</sub> = 15 V
- Meets all requirements of JEDEC Tentative
   Standard No. 13B, "Standard Specifications for Description of 'B' Series CMOS Devices"

### Applications:

- Serial shift registers F requency division
- Time delay circuits

RECOMMENDED OPERATING CONDITIONS at  $T_A = 25^{\circ}C$ , Except as Noted. For maximum reliability, nominal operating conditions should be selected so that operation is always within the following ranges:

CHARACTERISTIC	v <sub>DD</sub>	LIMITS		UNITS	
	(V)	Min.	Max.		
Supply-Voltage Range (For T <sub>A</sub> = Full Package Temperature Range)	_	3	18	v	
Clock Pulse Width, t <sub>W</sub>	5 10 15	180 80 50	- - -	ns	
Data Setup Time, t <sub>S</sub>	5 10 15	100 50 40	- - -	ns	
Data Hold Time, t <sub>H</sub>	5 10 15	60 40 30	- - -	ns	
Clock Rise or Fall Time: t <sub>r</sub> , t <sub>f</sub>	5,10, 15	_	15	μS	
Clock Input Frequency, f <sub>CL</sub>	5 10 15	_ _ _	2.5 5 7	MHz	

## CD4006B Types

MAXIMUM RATINGS, Absolute-Maximum Values:	
DC SUPPLY-VOLTAGE RANGE, (V <sub>DD</sub> )	
Voltages referenced to VSS Terminal)	0.5V to +20V
INPUT VOLTAGE RANGE, ALL INPUTS	0.5V to V <sub>DD</sub> +0.5V
DC INPUT CURRENT, ANY ONE INPUT	
POWER DISSIPATION PER PACKAGE (PD):	
For T <sub>A</sub> = -55°C to +100°C	500mW
For T <sub>A</sub> = +100°C to +125°C	Derate Linearity at 12mW/°C to 200mW
DEVICE DISSIPATION PER OUTPUT TRANSISTOR	
FOR TA = FULL PACKAGE-TEMPERATURE RANGE (All Package	Types)
OPERATING-TEMPERATURE RANGE (TA)	55°C to +125°C
STORAGE TEMPERATURE RANGE (Tstg)	
LEAD TEMPERATURE (DURING SOLDERING):	
At distance 1/16 $\pm$ 1/32 inch (1.59 $\pm$ 0.79mm) from case for 10s m	ax+265°C

### **PACKAGING INFORMATION**

Orderable Device	Status <sup>(1)</sup>	Package Type	Package Drawing	Pins Package Qty	Eco Plan <sup>(2)</sup>	Lead/Ball Finish	MSL Peak Temp <sup>(3)</sup>
CD4006BE	OBSOLETE	PDIP	N	14	None	Call TI	Call TI
CD4006BF3A	ACTIVE	CDIP	J	14 1	None	Call TI	Level-NC-NC-NC

<sup>(1)</sup> The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in

a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

**OBSOLETE:** TI has discontinued the production of the device.

(2) Eco Plan - May not be currently available - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.

None: Not yet available Lead (Pb-Free).

**Pb-Free** (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Green (RoHS & no Sb/Br): TI defines "Green" to mean "Pb-Free" and in addition, uses package materials that do not contain halogens, including bromine (Br) or antimony (Sb) above 0.1% of total product weight.

(3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDECindustry standard classifications, and peak solder temperature.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

#### **IMPORTANT NOTICE**

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.
